Information for sponsors and exhibitors

# iPlasmaNano-XIII 2024

The 13th international symposium on plasma nanoscience will be held September 15-19, 2024 in Hamburg, Germany.

Topics rank from the fundamental science to applications of low-temperature plasmas, ion beams, lasers, and related approaches and its relation to the fabrication, synthesis, modification, and integration of nanoscale materials, structures, and functional devices.

The meeting will include leading scientists and researchers in plasma science and engineering from around the globe. The symposium will be a Gordon-style meeting, with the total number of participants strictly limited to 80.

The international conference is jointly organized by Kiel University and the Leibniz Institute for Plasma Science and Technology (INP).

# Venue
